## Finding Matrix Elements

1. Carry out the following matrix calculations.

$$
\left(\begin{array}{lll}
0 & 1 & 0
\end{array}\right)\left(\begin{array}{lll}
a_{11} & a_{12} & a_{13} \\
a_{21} & a_{22} & a_{23} \\
a_{31} & a_{32} & a_{33}
\end{array}\right)\left(\begin{array}{l}
1 \\
0 \\
0
\end{array}\right)
$$

and

$$
\left(\begin{array}{lll}
0 & 1 & 0
\end{array}\right)\left(\begin{array}{lll}
a_{11} & a_{12} & a_{13} \\
a_{21} & a_{22} & a_{23} \\
a_{31} & a_{32} & a_{33}
\end{array}\right)\left(\begin{array}{l}
0 \\
1 \\
0
\end{array}\right)
$$

2. What matrix multiplication would you do if you wanted the answer to be $a_{13}$ ?
3. The bra-ket representation for the calulations in question 1 are

$$
\langle 2| A|1\rangle=? \quad \text { and } \quad\langle 2| A|2\rangle=?
$$

Write question number 2 in bra-ket language.
