## Linear Transformations

1. Using colored markers, draw the initial vectors, all on the same graph on your whiteboard.

$$
\begin{gathered}
\left.\left.\mid \text { red }\rangle \left.=1|\hat{\imath}\rangle+0|\hat{\jmath}\rangle \doteq\binom{1}{0} \quad \right\rvert\, \text { green }\right\rangle \left.=0|\hat{\imath}\rangle+1|\hat{\jmath}\rangle \doteq\binom{0}{1} \quad \right\rvert\, \text { blue }\right\rangle=1|\hat{\imath}\rangle+1|\hat{\jmath}\rangle \doteq\binom{1}{1} \\
\left.\mid \text { black }\rangle \left.=1|\hat{\imath}\rangle-1|\hat{\jmath}\rangle \doteq\binom{1}{-1} \quad \right\rvert\, \text { purple }\right\rangle=1|\hat{\imath}\rangle+3|\hat{\jmath}\rangle \doteq\binom{1}{3}
\end{gathered}
$$

2. Each group will be assigned one of the following matrices. Operate on the initial vectors with your group's matrix and graph the transformed vectors on a single (new) graph.

$$
\begin{aligned}
& A_{1} \doteq\left(\begin{array}{cc}
0 & 1 \\
-1 & 0
\end{array}\right) \quad A_{2} \doteq\left(\begin{array}{cc}
0 & -1 \\
1 & 0
\end{array}\right) \quad A_{3} \doteq\left(\begin{array}{ll}
0 & 1 \\
1 & 0
\end{array}\right) \quad A_{4} \doteq\left(\begin{array}{cc}
1 & 0 \\
0 & -1
\end{array}\right) \\
& A_{5} \doteq\left(\begin{array}{cc}
-1 & 0 \\
0 & -1
\end{array}\right) \quad A_{6} \doteq\left(\begin{array}{ll}
1 & 2 \\
1 & 2
\end{array}\right) \quad A_{7} \doteq\left(\begin{array}{ll}
1 & 2 \\
9 & 4
\end{array}\right) \quad A_{8} \doteq\left(\begin{array}{cc}
1 & 1 \\
-1 & 1
\end{array}\right) \\
& A_{9} \doteq\left(\begin{array}{ll}
2 & 0 \\
0 & 2
\end{array}\right) \quad A_{10} \doteq\left(\begin{array}{ll}
1 & 1 \\
1 & 1
\end{array}\right) \quad A_{11} \doteq\left(\begin{array}{ll}
1 & 0 \\
0 & 0
\end{array}\right) \quad A_{12} \doteq \frac{\hbar}{2}\left(\begin{array}{cc}
1 & 0 \\
0 & -1
\end{array}\right)
\end{aligned}
$$

3. Find the determinant of your matrix.
4. Make note of any differences between the initial and transformed vectors. Specifically, look for rotations, inversions, length changes, anything that is different. Are there any vectors which are left unchanged by your transformation? Your group should be prepared to report to the class about your transformation.
5. When your group is done, put a sketch of your transformed vectors on the chalkboard or prop your whitboard on a chalktray. State what your matrix does, give the determinant of your matrix, and mention any unchanged vectors or vectors whose direction is unchanged.
