Before Class 4

(A preparation for class—nothing here is for credit, but it’s strongly recommended)

1. Read Sections 12.1-12.2 and 12.4 in the textbook.

2. Work through these slides.

3. Try Conceptual Questions 5 and 7 on page 329; then Exercises 13 and 15 on page 330.

4. Try the items in Before Class 04 MP (that’s a Mastering Physics assignment in this term’s MP course). Note that all MP “assignments” are for practice only—there’s no credit for them. Just work as many of the items as you need to in order to have a firm understanding.
