## Worksheet \#16

(Wednesday, November 8, 2023)

## Name

## Questions (5 pts):

Consider a particle of mass m moving in 1 D in a constant field $f$, so that the Hamiltonian is given by $\mathrm{H}=\mathrm{P}^{2} / 2 \mathrm{~m}-f \mathrm{X}$. Write down the time-independent Schroedinger equation in:
(i) x - basis
(ii) p-basis

Which one would you prefer to solve? Why?
