

THIS WEEK IN BI 101

Portfolio #3 is due Monday November 24 by 5:00 p.m.

TUESDAY LECTURE

Biodiversity & Extinctions
Keystone species and efforts to preserve species and habitats.

NO RECITATION, LABORATORY, OR THURSDAY LECTURE

Have a Happy and Safe Thanksgiving Break!

ON-LINE READINGS

Silent Spring; California Condors
An excerpt from Rachel Carson's book; a species on the edge.

Work Ahead for the Online Readings

Read “Silent Spring” and describe the scenario that occurs in Rachel Carson’s fictional future town.

Review “California Condors” and answer the following questions:

How did the condors almost go extinct?

Why are the condors recovering?

BI 101's Final Exam is Tuesday Dec. 9 at 8:00 to 9:50 p.m.

Work Ahead for the Final Exam

Approximately 10 of the 60 questions on the final exam are cumulative. This material typically includes concepts that were covered repeatedly in the course. Try to think of two or three concepts we’ve covered repeatedly this term, then look at the beginning of last year’s final exam (Appendix D) to see if there were similar questions asked.

To make sure the week 7 material does not fade in the month’s time before the final exam, write one or two possible exam questions for each of the week seven objectives (# 110-126).
