Department of Integrative Biology May 28, 2014

# **Learning Outcomes Workshop**

**WARM-UP** 

# **STUDENT LEARNING OUTCOMES (**SLOs)

What Students Will Accomplish By The End Of A Course

PLACE YOUR OUTCOME SLIP HERE

THE **ESSENTIALS**  What? Who? Where? When?

Whv?

How?

BASIC INFORMATION ON WHAT LEARNING OUTCOMES ARE & HOW TO WRITE THEM

**Know** 

Outcomes Focus Our Attention On Student Learning

WHAT IS THE STRUCTURE OF AN OUTCOME?

### **OUTCOMES START WITH STUDENTS**

By The End Of This Course Students Will...

# **INCLUDE A MEASURABLE ACTION VERB**

What Do You Want Students To Know (Cognitive), Do (Behavioral), Or Think (Affective)?

Create **Evaluate** Analyze **Apply Understand** Remember

THE VERB DESCRIBES AN OBSERVABLE OR IDENTIFIABLE ACTION

Ineffective Verbs: understand, appreciate, know, be aware of...

Common mistakes: FIX each outcome

Vague Verb: Students will understand the consequences of various forms of pollution.

Not Assessable: Students will appreciate the benefits of exercise for the cardiovascular system.

Not Specific Enough: Students will develop effective science skills.

More than One Outcome: Students will demonstrate problem-solving skills and learn how to work with peers.

1

# **CREATE**

**APPLY** 

Department of Integrative Biology May 28, 2014

FAST FACTS:

Teaching Goals are general and can guide outcome development

- Course outcomes focus on student knowledge, skills or attitudes
- One course outcome can be made up of sub-outcomes (objectives)

## **SUB-OUTCOMES (OBJECTIVES)**

- There is no universal agreement on the use of the terms "outcome" vs. "objective."
- Sometimes course outcomes focus on what students will achieve and instructional objectives focus on intended results of specific activities.
- Sub-outcomes (objectives) can be used as building blocks to produce the **behavior** that demonstrates mastery of an outcome.
- Every lecture, lab, recitation, and assigned reading can have sub-outcomes (objectives).

**Behavior**: What do you expect the student to be able to do?

Condition: Under what conditions (timeframe, circumstances, or context) will the learning occur?

Degree: What is the measurement; how much, how well,

and to what level?

Write a sub-outcome (objective) based on your outcome slip:

WHO USES OUTCOMES?

TEACHING TEAM Instructors Teaching Assistants

ADMINISTRATORS
Program Outcomes
University Goals

**STUDENTS**Current Students
Future Students

WHERE DO OUTCOMES APPEAR?

SYLLABUS ACTIVITIES STUDY GUIDES WHEN ARE OUTCOMES TYPICALLY WRITTEN?

**DURING:** Directs how the course is developed **DURING:** Students contribute to outcomes **AFTER:** Outcomes are revised over time

WHY ARE OUTCOMES IMPORTANT?

Shared Outcomes Experiences

Student Success

Transparency lets students know what they need to do to succeed

Teaching Strategies

Activities and assignments are designed with students in mind

Appropriate Assessments

Outcomes define course impact; how students are expected to change

Your Idea?

**FAST FACTS:** 

- The achievement of learning outcomes (student success) measures institutional effectiveness
- Write outcomes in language that students are able to understand
- One activity or assignment can address multiple outcomes

**INSTITUTIONAL GOALS & OUTCOMES** 

**NATIONAL REFORMS & STANDARDS** 

**HOW DO I WRITE EFFECTIVE OUTCOMES?** 

STUDENT AND PEER INPUT

**DATA COLLECTION & ANALYSIS** 

#### BRAINSTORMING

What Are Things You Want Students To Know, Do, And Think (Or Value)?

### Brainstorm HERE:

- 1. What broad goal would you like to accomplish? Think BIG
- 3. What do you want students to be able to know, do, or think?
- 4. What conditions (circumstances or context) will assist students?
- 5. How will you measure learning?
- 6. Write a possible student learning outcome.

### **OUICK START: WORK BACKWARDS**

Think of an activity, demonstration, product, or assessment that you like, and try to summarize in one sentence what the students get out of the experience.

**NEXT STEPS** 

Outcomes Collection

Assessments

# PUT YOUR OUTCOMES INTO ACTION

Match Activities And Assessments With Outcomes

**OUTCOMES** COLLECTION

### **COLLECT AND ORGANIZE**

Develop A Group Of Outcomes That Document Student Course Experiences

Department of Integrative Biology May 28, 2014

MATCHING
ACTIVITIES WITH
OUTCOMES

### **ALIGNING COURSE ACTIVITIES WITH LEARNING OUTCOMES**

Three Steps To An Organized Course Experience

Step 2: Activity Support

What background skills and content knowledge do students need to complete these activities?

What resources are likely to make these activities successful?

How do I need to prepare to teach?

Lay out the entire schedule including readings, homework, and assessments

Reevaluate: Do the activities reflect the emphasis of the student learning outcomes?

Keep notes and revise the curriculum as needed

DEFINITIONS

## **ALIGNING ASSESSMENTS WITH LEARNING OUTCOMES**

Measuring Student Success In Courses

ASSESSMENTS
WITH OUTCOMES

MATCHING

**ASSESSMENT:** Collecting Data On Student Learning **EVALUATION:** Assigning A Grade Or Value To An Assessment

Step 1: Selecting Activities

Research possible activities

(start: NSTA's Journal of

College Science Teaching)

Develop a variety of activities

to address diverse outcomes

Match activities to breadth and

depth of outcomes

**RUBRIC:** An Indication Of Varying Degrees Of Achievement

Outcomes - Activities - Assessment Grid

Student Learning
Outcome

Pre-Class Homework Student Self-Assessment In-Class Activity Follow-up Assessment Learning Reflection

Modify this grid as needed; include frequent and varied assessments that students can use to monitor their learning

EFFECTIVE ASSESSMENTS MATCH
THE DEPTH AND BREADTH OF OUTCOMES AND
COURSE ACTIVITIES

ASSESSMENT IS MOST EFFECTIVE WHEN ON-GOING, NOT EPISODIC

SOME ASSESSABLE OUTCOMES MAY BE DIFFICULT TO EVALUATE

ESTABLISH CLEAR ASSESSMENT
EXPECTATIONS TO SUPPORT STUDENTS FROM
DIVERSE BACKGROUNDS

BOTH STUDENTS AND INSTRUCTORS CAN ADJUST PERFORMANCE BASED ON MID-COURSE (FORMATIVE) ASSESSMENTS

SAMPLE ASSESSMENTS PROVIDE STUDENTS
WITH GOAL INSIGHT

INVESTIGATE NEW ASSESSMENT TECHNOLOGIES AND RUBRICS

THROUGH OUTCOMES AND ASSESSMENTS, INSTRUCTORS MEET RESPONSIBILITIES TO STUDENTS AND THE PUBLIC

4

Consider

# REACHING THE FULL POTENTIAL OF LEARNING OUTCOMES

Use Learning Outcomes To Develop Curricular Innovations

STUDENT VOICE

### WHAT ARE YOUR STUDENTS' OWN LEARNING OUTCOMES?

What Do Students Want To Get Out Of A Course?
Building Metacognition Into The Curriculum
Valuing And Representing Student Perspectives
Monitoring Cultural And Social Changes Through Student Input

*Develop a strategy to include students in the curricular design process:* 

# **TEACHER LEARNING OUTCOMES (WHY NOT US TOO?)**

Lifelong Learning As A Critical Component Of Teaching Assessing Our Progress As Educators Reflection And Self-Assessment Developing, Revising, And Applying A Teaching Philosophy

Write a learning outcome for yourself.

## **DEVELOPING UNIQUE COURSE OFFERINGS**

Learning Outcomes Beyond The Textbook
Courses That Reflect Personal & Institutional Identity
Meaningful Courses That Support Departmental Missions And Goals
Teaching As A Creative Endeavor

Sketch three new potential class experiences for you and your students

What Is A Step You Can Take To Continue Your Exploration Of Learning Outcomes?

THANK-YOU!

### **MORE VERBS**

Remember (Knowledge): Match, Memorize, Order, Quote, Arrange, Recognize, Reproduce, Restate, Retain, Define, Duplicate

**Understand (Comprehension):** Characterize, Translate, Classify, Complete, Review, Sort, Relate, Illustrate, Identify, Explain, Express, Establish, Depict

Apply: Solve, Administer, Calculate, Compute, Choose, Conduct, Dramatize, Perform, Demonstrate, Employ, Interpret, Operate

#### **FVFN MORF VFRBS**

Analyze: Test, Research, Appraise, Contrast, Question, Critique, Diagram, Distinguish, Explore, Experiment, Examine, Discriminate

Evaluate: Grade, Rank, Rate, Review, Inspect, Assign, Estimate, Argue, Value

Create (Synthesis): Design, Envision, Write, Unite, Construct, Consolidate, Formulate, Merge, Integrate, Organize, Propose, Hypothesize, Theorize
