Undergraduate Summer Research Program in Mathematics
Oregon State University

Summer 1993

Dennis J. Garity, Director

Papers Produced by Participants

Table of Contents

Helga Fuller
A Construction of the Universal Menger Curve
Advisor: Dennis J. Garity

Charles Humphreys
Hypercube Variant Linkages
Advisor: Paul Cull

John Karro
The Complexity of Computing Fibonacci Numbers
Advisor: Paul Cull

Kenneth H. Keppen
On K-Stage Euclidean Domains
Advisor: Robert Robson

Mark MacLean
Eigenvalue Computations: The Power and Lanczos Methods
Advisor: Andre Weideman

Nicole M. Mayer
Random Neural Nets with Small Connectivities
Advisor: Paul Cull

Cassandra S. McGee and Eva F. Wailes
The Unknotting Number for $2k+3, 2j+1, 2k+2$ *and Other Knots of the Form* a, b, c
Advisor: Dennis J. Garity

Amy Pilkington
Numerical Analysis of Love's Equation
Advisor: Andre Weideman

Romyar Sharifi
On Cyclotomic Polynomials, Power Residues, and Reciprocity Laws
Advisor: RobertRobson

Eric Thomas
A Comparison of Approximation Methods for the Convection–Diffusion Equation
Advisor: Andre Weideman
